

GM22 Hygiene regulations at the MPI-AGE

- We would like to ask all the GM22 guests to take a **COVID-19 self-test**, either the day before or morning of (we will provide some at registration) the meeting. Only attend the meeting if the test result is negative and if you are symptom-free. Participants that test positive or have symptoms, please inform us, the General meeting group, at general.meeting@phdnet.mpg.de
- **3G rules (vaccinated, recovered or tested) apply** within the institute and will be **checked upon registration on Monday** to receive your name badge. It is not permitted to be at the MPI-AGE without a name badge. For those who do not qualify for 2G (vaccinated or recovered), a negative test (self-tests are not permitted) will be required for each day.
- Medical or FFP2 masks are to be worn at all times when indoors but can be removed while eating or presenting. Some FFP2 masks will be available at registration.
- All participants, speakers and contributors are encouraged to **observe hygiene rules** for proper coughing and sneezing as well as for thorough hand washing and best possible distance to other participants. A distance of **1.5 metres** must be kept as much as possible.
- There is a maximum number of 110 (100 participants + 10 helpers/speakers) in the auditorium. There are no limits in the seminar or meeting rooms. In closed rooms that do not have technical ventilation, ventilation is carried out via the windows for a few minutes at regular intervals, preferably during breaks.
- Hand disinfectant will be provided throughout the entrance area, sanitary areas and in front of rooms.
- Coffee breaks will be served in the Atrium but participants are strongly recommended to move to the outside area weather permitting. This also applies for the provided lunch and dinner. Meals will be served in a one way system and in compliance with the required minimum distances. All participants will find daily usable canteen vouchers in the participant documents.
